About the Publication Finder

The Publication Finder is a tool that can help researchers identify whether a specific periodical title is available within the online holdings from the CCAC Library. It includes thousands of titles that appear within dozens of subscription-based research databases. Using the publication finder, researchers can:

- search for articles published in a specific magazine or journal
- check coverage dates and availability
- link to the appropriate research database where articles and be browsed and searched

Connecting to the Publication Finder

A link to the Publication Finder can be found on the Articles & Databases tab of the CCAC Library website: https://www.ccac.edu/library

Searching

After connecting, enter a title or subject in the search form and click the search button (see other side of this handout for the results list).

Browsing by Discipline

Alternately, to see what titles are available by discipline, follow one of the links on the lower half of the screen.
**The Results Screen**

The results screen will display any relevant titles based on your search. For each title in the result list, you can:

- A) Search for articles from a specific publication
- B) Browse Full Text Access details to see dates of availability, full text availability, and more

(A) Searching

Use the search box under a journal title to find articles that were published in that journal. The above example, shows a simple keyword search for "recruiting" within the *Human Resource Management* journal.

Search results will appear in the main part of the screen (see example below.) Click an article title to see more about that item or click a "full text" link to view the article.

(B) Browse Full Text Access

Clicking a database that's listed in the Full Text Access section (Business Source Complete in this example) will show you the holdings information for that publication.

The main part of the screen shows which publication dates are included in the database, whether the publisher has an embargo period, and whether full text is available.

The right side of the screen allows you to browse and view issues by date, volume, and issue number.
